JIB BOOMS

Arrow Jib Booms make it easy to move bulky and nonpalletable items safely since the boom is designed to stabilize the load. The angled design increases visibility, allowing the operator to be more precise. The Arrow Jib Boom allows your machine to reach farther than before with a 72-inch lift height and 66 inches of horizontal reach. For use with skid steers when handling trees, timber, and more.

Steady Lifting
Move bulky nonpalletable items safely since the boom is designed to stabilize the load.

Angled for Precision
Make precise movements with increased visibility due to the boom’s angled design.

MODEL   | CAPACITY     | HORIZONTAL REACH |
---------|--------------|------------------|
CJ10UN   | 1,000-1,600 lb | 66 in            |
CJ25UN   | 2,500-3,750 lb | 72 in            |
EXTENSION BOOMS

Move trees, trusses, and other awkward materials with Arrow’s heavy-duty Extension Booms. Always find the perfect balance between load capacity and reach by utilizing the boom’s eight different hook positions. The Arrow Extension Boom can fit a variety of fork sizes, making it easy to use with a variety of machines. The tubular design and built-in safety systems keep this boom lightweight, durable, and safe.

TRUSS BOOMS

The Arrow Truss Boom provides a clear line of sight, allowing for accurate positioning of truss and other bulky material. The built-in pintle hook with safety latch keeps the truss secured to boom, increasing safety. Additionally, the lightweight but durable design preserves the load capacity of your machine. Arrow Truss Booms fit telehandlers, wheel loaders, and skid steers, and are available in fork, quick-attach, and telehandler coupler variations.

It’s All in the Name
Lift and position truss with this residential construction must-have.

Keep Loads Secure
A built-in safety system protects and secures your load to the boom.

More than a Couple Couplers
Available in fork, quick-attach, and telehandler variations.
