

LOAD BACKREST

Steel Load Backrests are designed to prevent your load from shifting backward when the carriage is lifted to full height. This allows loads to rest against a square, flat surface that makes transporting safer. Front Mount styles are built with a full-length, front-mount plate and side-mount styles are available for bolt-on or weld-on applications. There are no standard part numbers as all load backrests are engineered to order to ensure a perfect fit.

SHAFT BARS

Replace Steel Shaft Bars for a variety of applications including carriages on Telehandlers, Skid Steers and Forklifts. Optional welded collars offered. Stress Proof™ material available.

SHAFT BARS	DIAMETERS	LENGTH	POSITIONED HOLES
Shaft Bar Range	1.5 to 4.0 in	custom	0.625 in hole positioned 0.5 in from each shaft end

*custom drill holes available

1 DAY LEAD TIME

CARRIAGE BARS

With Arrow Carriage Bars and a little welding, your downtime is kept to a minimum.

SEATS & SEAT BELTS

The Chairman Forward tilt / Folding back
Part# S999599

The Boss Bucket Seat
18" Seat: Part # S999999*

Poorly designed seats are a major cause of operator fatigue and even injury. Replacing a worn-out seat with a new seat can be a great way to improve productivity and employee retention. Arrow seats are made from 10-gauge steel framing and heavy-duty vinyl fabric. Seats include seat-belt mountings and belts come complete with mounting hardware.

The Executive / Forward tilt
Part # S999444

The President Suspension Seat
Vinyl Seat: Part # GS12

Retractable Seat Belt Part # SB1000R
