

SAFETY PRODUCTS

Arrow MHP offers products that focuses on creating safer workplace environments for pedestrians and employees. Using the latest in safety innovations, this cost-effective line of products helps protect your company assets and the materials they handle.

Bumper Guard Forklift Protectors

Bumper Guard Forklift Protectors are specifically designed to protect your forklift truck from impacts and collisions. Using two 100 lb. magnets, Bumper Guard Protectors can be affixed on the shank of your forks or anywhere on the forklift truck's exterior in need of added protection. They can also bend 90-degrees to protect corners.

Features and Benefits:

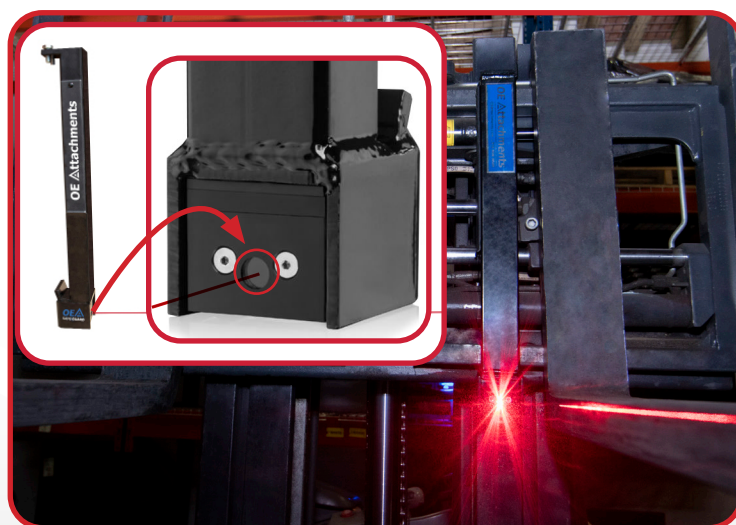

- *Protects vehicles and products alike; reduces collision impact*
- *Attaches to 4", 5", and 6" forks in seconds*
- *Can bend 90 degrees to protect corners*
- *Attaches via two 100 lb. magnets (two-way tape and fork brackets also included)*
- *Neon yellow color makes the product highly visible*
- *Dimensions: 18" L x 4" W x 1.5" D*

Fork Laser Guide

Using a bright red laser, the Fork Laser Guide reduces the risk of damaging pallets, assets, and rack structures by providing operators a constant visual reference of their fork's position. This product fits all standard forklift carriages and features the brightest, most reliable, commercial-grade laser available.

Features and benefits

- *Ultra-bright red laser accurately shows the position of forks*
- *Two laser options: single horizontal laser (for loading) or dual laser that comes with an additional laser dot (for unloading)*
- *Two power options: rechargeable 6V battery or hardwired*
- *Rechargeable battery lasts up to 50 hours at full charge; battery conservation feature will turn off laser 4 minutes after engine is turned off*
- *Cold storage models available that can operate in extremely cold or hot temperatures*
- *Height control options that disable the laser once it's at eye level*
- *Wireless remote available*

SAFETY PRODUCTS

FORK SHIELDS

Protect the most vulnerable part of the forklift fork from nicks, gouges, and accidental damage resulting in stress cracks. By using these easily mountable protection devices, forklift forks last significantly longer and protect against costly early replacement. Arrow Fork Shields come with everything you need for easy installation. Three sizes are available based on the width of your forklift forks.

Fork Shield Installation Instructions:

- Clean fork heel area of dirt and debris.
- Remove clear release liner from Velcro.
- Install shields on each fork with slotted tab towards back of fork.
- Allow a minimum of 15 minutes for adhesive to bond prior to use.
