

# HYDRAULIC SKID STEER FORK POSITIONER

## THE ULTIMATE ALL-IN-1 FRAME SOLUTION

### Versatile “All-in-One” Frame

- » **Dual Functionality:** Use the frame as a standard skid steer frame or convert it into a fork positioning frame.
- » **Effortless Conversion:** Transition from standard to fork positioning in just a few steps:
  - » Lift the kit into the frame.
  - » Install and tighten 4 end bolts & 4 bracket bolts.
  - » Attach the jump hoses.

### Standard ITA Fork Compatibility

- » **Fork Pocket Design:** Works seamlessly with standard ITA Class 2 forklifts—no need for special forks with welded lugs.
- » **Easy Fork Adjustment:**
  - » Place the forks into the pockets.
  - » Secure them in position with the stop block for a locked, reliable fit.

### Superior Serviceability

- » **Convenient Maintenance**
  - » Remove the fork positioning kit from the frame for open and accessible servicing.
  - » Eliminate the hassle of working in tight spaces within the frame.
- » **Minimized Downtime:**
  - » Quickly swap out parts or fittings by replacing the kit entirely.
  - » Use the frame as a standard skid steer frame during repairs for uninterrupted operation.

Built for **EFFICIENCY,**  
**FLEXIBILITY,** and  
**EASY MAINTENANCE.**
